Little League Efforts Pay Big Dividends To Belle Glade Youngsters

Community Effort Entered Into
Enthusiastically By
Many

More than 100 boys—4 full teams—two hundred parents, four hundred grandparents, uncles and aunts—and at least 400 brothers sisters and other relatives were morally uplifted physically exercised and psychologically improved thru the efforts of the LITTLE LEAGUE in Belle Glade, during the past few weeks.

ball players" on the field twice a week in Belle Glade than in any two of the so called major leagues—there weren't any more proud, hard working and scientific players congregated anywhere. Parents "voiced" vociferously who had never before witnessed a self-imposed decorum by raising the voice. Pige Chaste, president at the ceremony last week giving out the awards and designating the winning team, valuable players, etc. said: "Personality and on behalf of Glades Little League in Belle Glade, during the past few weeks."

Mixed Cars, Corn and Celery Make Up 65% of Movement With Beans Taking Fourth

Mixed Cars Pull Ahead Fast.
With Corn Taking A Permanent Place In Glades Economy

Ten years ago celery was a major crop in the Glades with something over 2,000 cars moving out; mixed vegetables accounted for approximately 1,000 cars and corn was an interloper with one car recorded.

In the season 52-53, celery accounted for 6725 cars, mixed vegetables filled out the equivalent of 9718 cars while corn tagged along in the big movement with 4210 cars; the total of the three accounting for 16,706 of the approximately 25,000 car lot equivalent sold from the Glades.

Six million dollars buys a lot of stalks of celery, and gives the railroad and truckers more than \$3,500,000 for transportation in addition. Mixed cars brought transportation facilities about \$3,400,000 while bringing the farmer a gross of nearly \$7,000,000. Sweet corn the new money crop of the Glades vegetable farmer rang the bell for two and a half millions for the transportation boys while bringing near \$4,000,000 for the local boys to distribute to the grocer, the baker, the fertilizer man and other suppliers with a bit left for himself.

The two fair-haired items as far as local farmers are concerned however are corn and mixed cars. Corn is a new crop since '48 and has accounted for a lot of bills being paid thru the long list of items that go into planting and harvesting a sweet corn crop.

A most substantial item, however, is the mixed car deal—it's the solid building of a substantial and dependable distribution of Glades grown vegetables. Its tendency is to eliminate dependency on the former large concern—it's getting into the highways and byways of consumer use. Any organization with a substantial portion of its business derived from mixed car sales practices modern salesmanship with a system and on-the-spot attention for this type of business is the "plug-head" of vegetable salesmanship.

Back in '41-'42 and '43-'44 around 1,000 cars of mixed veg-

BUILDING PERMITS KEEP STEADY PACE

Quite a number of Belle Glade residents decided to build homes of their own during the months of May and June.

In the S. E. section C. L. Williams home will be ready for occupancy before long. Located on the corner of S. E. Ave. P and S. E. Fourth St., it is two bedrooms, 11,400 CBS construction.

On S. E. 5th St., Judea Pennington is building a \$6,000 concrete block home which is well under way.

Other permits for new homes are Richard Hodges, \$7,000 residence, Sylvia Hays, \$11,000 residence, N. L. DePamphill, frame residence, \$6,500, E. J. Smith, \$11,000 residence, \$11,000 residence, and S. E. Ave. D is near completion, \$14,000. Coastal Motors and Equipment are making a \$6,000 concrete addition and City of Belle Glade Jail \$30,000.

Adult Vocational Education Is Well Received In Glades

"The response to an invitation to attend a welding class under the combined State and County system has been most gratifyingly received by students in the Glades," said Floyd Rider in a talk to Rotarians on Friday (and "an investigation on the possibility of a class on a commercial subject brought applications from more than 50 where a dozen or fifteen students was expected."

In the welding class just finished, where 13 students graduated, Mr. Rider told of the enthusiasm they caused an 18 hour course be stretched into 24 or 25 hour course by overtime and thru three extra sessions. A normal class turns up approximately 50 per cent of the students who are attending are from curiosity and for time-killing with no idea of graduation.

(Continued on Page 2)

JUNE REGISTRANTS HAVE EXAMINATIONS

On Monday, June 22, 1953, 34 registrants from this area were ordered to report for preadmission examination. Three transfers were reported, making a total of 37. They left by special bus for Miami from the Local Board Office at 8:30 a. m. according to Mrs. F. W. Quinn, local Board Clerk.

William Thomas (Bill) Aspy received his Bachelor of Science degree with the class of '53 at the Forty-eighth annual commencement exercises of Florida State University, Tallahassee.

While at Florida State he was treasurer of Tumbala Chi Alpha, social fraternity.

Bill enlisted in the Marines in February and has received orders to report for duty in the Marine Reserve, Quantico, Va. He leaves July 5.

Road Travelling Tractor Causes Some Excitement

Highway Patrol, assisted by peace officers and local citizens put in a busy several hours in a cross-country manhunt Monday afternoon before they ran their quarry down and lodged him in jail.

It all started with a highway accident some 12 miles south of South Bay on SR 80 when a State Road Department tractor driven by Norris Turner, age 48, of Palatka and travelling north was stuck in the rear by a 1952 GMC truck driven by Justin Bryan, age 33, of Jacksonville.

The tractor was hurled into the ditch by the impact and demolished. Turner was rushed by ambulance to the Belle Glade Memorial Hospital where it was (Continued on Page 3)

Largest Vegetable Co-op Closes Successful Season And Distributes Savings

Know Your C of C
Officials And Its
Active Membership

TODAY WE GOT YOU
IVAN VAN HORN

Back in North Loop, Nebraska, at the age of 12, Ivan Van Horn frequently sat up all night to nurse a blanket-wrapped calf through to another sunrise. He saved quite a few calves. Fifteen years later, on the night of the '28 storm, he sat up all night again, this time to nurse a belly.

Co-operative Vice President A. E. McCabe's report showed a total of 2,384,329 complete packages composed of 25 different commodities handled thru the organization. This tonnage represents a 150,000 package increase over last year's business.

As an operating unit, the Co-op's finances are reflected in the action of the Board in authorizing the payment of 6 per cent on all certificates held as well as the entire retirement of the 1950 certificates in cash.

Certificates are issued each year for the savings effected for the immediate past season, when it was six, two and even that neither the barge nor the hundred-odd souls aboard would live to see another sunrise.

No doubt there are people in the Glades who came here before Ivan Leo Van Horn arrived at there aren't very many of them. A lot of water has gone 'tween these canals since that day in 1914 when the Van Horn family left that Nebraska farm and took up squatters' rights on forty acres of land a mile or two from the present site of Bean City.

The first thirteen years of Ivan's life were spent on the farm where he was born in 1901. For the most part he's lived in the Glades since 1914. Since 1925 he's been a dealer and a commission agent for the Standard Oil Company. He's also a director of the Belle Glade Chamber of Commerce, and (Continued on Page 5)

Country's Largest Hydro Project Operated By Local Group

Until concrete evidence is produced to the contrary, the Glades has the largest water vegetable grower—owned co-operative and has the highest capacity hydro preconnector known, and this is not out of line with the largest in size and volume vegetable producing country in the U. S. or very near it.

Pioneer Growers Cooperative brought its season's operations to a close Tuesday night with a meeting of the membership, the distribution of savings for one year, paying the regular 6 per cent dividend on certificates and retiring all 1950 series certificates for cash, and all this was followed by a barbecue supper.

Co-operative Vice President A. E. McCabe's report showed a total of 2,384,329 complete packages composed of 25 different commodities handled thru the organization. This tonnage represents a 150,000 package increase over last year's business.

As an operating unit, the Co-op's finances are reflected in the action of the Board in authorizing the payment of 6 per cent on all certificates held as well as the entire retirement of the 1950 certificates in cash.

One Killed, One Seriously Injured In Auto Collision

Two automobiles, sideswiping each other apparently on the center line of the center marker of the road, involved nine persons, left one dead, one with two broken legs and two with broken arms and possible internal injuries, on State Road No. 90 U. S. Highway 441, just four miles east of Belle Glade, about midnight last night and on a dry roadway.

Corporal Dugger of the Highway Patrol assisted Chief Constable Prescott and Chief Goodlett investigated the accident.

Mr. Arthur Perdue 48, of Colonial Heights, Va., accompanied by his wife Mary and two sons Billy aged 11 and A. B. Jr. aged 14, together with Mrs. T. M. Farham, Jr., and son Russell, aged 15, was proceeding west on State Road No. 90, at a reported speed of about 80, at a reported speed of about 80, at a reported speed of about 80.

Mrs. Velma Ruth Carver of 1823 Congress Ave., West Palm was the first game of the night season.

ELKS WIN OVER PIONEER GROWERS

The Pony League got off to a wet start in their first game last Tuesday night. Playing in the first game, Elks won over Pioneer Growers 1918.

Game between Lions and Elks was called off after first inning and will be played later. Despite the wet weather there was a large turnout but the game was terrible and very smoggy.

ADULT VOCATIONAL

(Continued from Page One)
ating, but this class graduated 100 per cent," he said.
In telling of his activities Mr. Rider praised the value of the knowledge in welding. "It is one of the fastest growing professions. We can now weld steel, stainless steel, brass, bronze, copper, brass, and aluminum, each to its own kind, or each to the other thing that has been recently been developed."

"The knowledge of welding is needed in almost every shop nowadays, because of its universal acceptance in the metal industries, and that is particularly true in an area like the Glades not only for the time saved in repair, but when that time is saved, as for instance, where a group of laborers are dependent on the operation of a machine for their own activity."

Mr. Rider attributed to the invention of the coated rod the unprecedented growth of the welding and the production of special alloys in rod form to the more recent practice of welding different materials to each other.

Mr. Rider made an appeal to Rotarians and all others to give this vocational training a boost whenever you have the opportunity.

"Any man is much better off if he has two trades instead of one, and makes him more secure in his job, for most likely there will come many occasions when ability to stand his right in with his work."

NEWS OF GOLAIDS BOYS
(Continued from Page 1)
at the door. Sunday morning lunch is served anywhere from 9:30 to 12. Oh, yes, the stocks are good, they taste like they might come from Fritz Stein's Ranch.

Pearl Harbor, T. H. (PHINX) James E. Norris, husband of the former Miss Mylene Sweet, of Belle Glade, recently returned here aboard the destroyer escort USS Renner from a six month tour of duty in the Far East.

During the cruise the Renner rescued four survivors from a four-engine Martin P-40 bomber that crashed at night in the raging Sea of Japan.

She escorted the battleship USS New Jersey and the heavy cruiser USS Bremerton on bombardment missions with the Nationalist Chinese Navy. Shows leave was enjoyed by the men in Japan, Okinawa, Formosa and Hong Kong.

Scheduled to participate in a two-month training cruise aboard a ship of the U.S. Navy's 1953 Midshipman Practice Squadron is Midshipman first class John S. Parke, USN, son of Donald D. Parke of Belle Glade.

ROAD TRAVELING
(Continued from Page 1)
found he had suffered severe fractured ribs and multiple cuts and bruises.
Bryon caught a ride to South Bay with a passing motorist and reported the accident. He then started to return to the scene of the accident with another motorist, but was stopped by the police and taken to the hospital.

Following his peculiar behavior, lodged in his car and taken to South Bay to summon, official help and Captain Bernard Friend responded.

stable Prescott, assisted by a number of local citizens pursued the fleeing Bryan across corn fields, cane fields, bean fields and canals. Bryan finally came out on the highway near Bean City, fled across the beach and took refuge on the pine trees.

There he was hemmed in by the officers and taken to the police station. He was held in the South Bay city jail awaiting transfer to the County Jail. Police and Sheriff Frank Preval, Deputy Sheriff Harold J. Bertrand of the Highway Patrol. Officers estimated that Bryan ran over five miles across country before he was stopped at the water's edge of Lake Okechobee and captured.

LITTLE LEAGUE
(Continued from Page One)
Inc. I would like to express my appreciation to the parents of all the boys who have participated in the Little League Baseball this year. The spirit of trust and confidence which the parents have shown in our organization has been most gratifying. We appreciate your interest in our efforts to provide a wholesome recreational program for these young boys and your support in the various activities.

Those of you who come to see the games do not realize the number of people who have been helped by this program. There are a number of boys who have been helped by this program. There are a number of boys who have been helped by this program.

First, the fellows who work almost every day with some problem of Little League and their team, are the Managers. We feel lucky this year to have had men in this position, to whom the boys look up to, both as a coach and manager and also as men of character whose example is inspiring.

Rotary-Bill McClatchy, C. W. Crosby, Jr., Fred Farmer, Legion-Garold McKee, Rev. Ford, Casper Van Landingham, Vernon Brooks.

Lions-Tommy Parker, A. J. Richmond, Joe Cooke. Fks-Sam Crockett, John Waters, Willard Scheffer.

The fellows who have been exceptionally faithful and performed their duties very satisfactorily, contacted and organized by R. E. Horard, headed by W. Mosley, the following units are Frank Theibaud, Doug Thompson, Bill Rhodes, Eddie Crosby, Woody Fiebert and Sonny Smith.

The official scorer-W. E. McConnel assisted by Fred Willard, Ben McCall, all of whom have been very faithful and turned in a good job.

Many have helped at various times in working on the diamond. In the evening stand but we prepared the diamond before each game are Clarence Throp, C. W. Crosby, Jr., and Joe Campbell.

We owe a vote of thanks to all the ladies who have helped in the evening stand but we prepared the diamond before each game are Clarence Throp, C. W. Crosby, Jr., and Joe Campbell.

For being so faithful and seeing that the games were started promptly on time and played in the accident, and in accordance to Little League rules.

and in the best interests of the boys. He is indebted to R. Y. Creech, Jr., who has done a fine job as Commissioner.

In addition we are grateful to the following for their cooperation, time and money donated. The City of Belle Glade, Mayor Collins and Com. Carlton. Prof. Hobson and the School for the Blind. The Lions League, Elks and Rotary for their initial interest and donation which gave Little League its first push. Wedgworth Farms made numerous contributions in men, money and materials and we thank George for all the boys.

We are indebted to Sam Knight for numerous donations, for it was he and Herman Close who first came up with the idea of a recreation program for our boys 9 thru 12.

The Belle Glade Machine Works for helping erect the backstop.

Rethwing and Belle Glade Hardware for score board and the publicity given the Little League.

The men who have spent many hours in the problem in promoting Little League and elected by the general membership are your board of Directors: President, Paige Choate; Vice President, Bob Creech, Jr.; Secretary, R. V. Dwyer.

Mary Lou McDonald, Directors, Bruce Williams, J. N. Norris; Bill McClatchy; Rev. Robert Ford; Frank Willard; and George Wedgworth.

SCHOOL OF LOGISTICS REALLY IN EARLY STAGES
SAVING EXAMINER ROBERTS
Lieutenant Kenneth Roberts, USA reserves has just returned from Fort Leavenworth where he attended a ten-day school on the subject of logistics in the Army.

"We attended classes with French, Chinese and many other of our United Nations' representatives, and the time was filled with classes and business." said Lt. Roberts. He reports that classes ran until ten and eleven o'clock at night most of the time.

It appears from this information that certain branches of our army really are taking training seriously.

RECREATION PROGRAM STARTS WITH HIS OFF TO GOOD START
The summer recreation program started off with a bang Monday morning when 118 children registered in the first day and 43 more the second day, which makes 159 and more are registering every day.

Among the many activities in which the children may participate, swimming is the most popular. Tuesday afternoon 115 children were transported to the Pahokee pool. N. S. Stalling and Kilgore Seed Co. furnishing trucks for the trip. Mrs. G. R. Townsend furnished her car.

Supplying trucks for today are Walter Schlechter and Agriculture. Organizations or individuals who are willing to furnish trucks for Tuesday and Friday afternoons are asked to call 3088 or 3149 or contact director at 3149.

Activities are planned in advance so that children of same ages will be grouped together for their chosen activity at the proper time. Schedules are posted on the park bulletin board.

One special event is being planned for each week. Wednesday, July 1, at 2 p. m. a pet show will be staged. Children are to bring pets either on a leash or in a cage for display. Twenty pets have been registered so far and everything is included from snails to mammals. Classifications for judging the prettiest, cutest, most unusual, best trained, largest and smallest.

Special event for the week following will be a square dance to be held in the evening on tennis courts. Date will be announced later, as well as other special events. Parents are invited to attend.

KIDDER INSTALLS TWO WAY RADIO
A two way radio between office and car has been installed by Dr. C. W. Kidder, local veterinarian to aid in the operation of his veterinary practice.

The two way radio system will give Dr. Kidder instant and constant communication with his office. The equipment has a radius of 25 to 30 miles and operates on a set channel assigned to veterinarians.

Dr. Kidder says there are at least three reasons for the installation of this modern equipment. It will promote better service, give quicker contact, and enable him to give direct communication at all times whether in his office or on a call in the country.

D. C. NELMS JOINS FOREST RANGERS
Mrs. Omar Nelms, student at the Florida University, Tallahassee, is one of four boys at the University who have joined the Forest Rangers for the summer at B. R. C. Camp 255, Clarke, Idaho.

D. C. writes his folks that the scenery and forests are wonderful. The boys do various kinds of work pertaining to forestry such as planting trees, treating trees with insecticides, trimming and topping and also a look on forest fires.

He plans to return to Florida State in the fall.

WESTERN AUTO TO GIVE FREE ORCHIDS
Western Auto Store is now open for business at their new location 5672 S. W. Ave. A, just opposite the Fire Station. The new home is one of the oldest pioneer block buildings which has been completely renovated and boasts a new modern front. Outfitted with all new fixtures, Jack Royals, the proprietor, is very proud of its appearance.

With a floor space twice the size of the former store, a wide selection of stock will be offered our customers," he says. A C. English, Miami, supervisor for Southeastern Florida, spent four days here assisting in organizing the new store. Two men were supplied from Jacksonville to help install merchandise. Mr. Royal, who has served the Glades for the past six years will continue to offer the best merchandise and values available, he states.

A large shipment of fresh Hawaiian Vanda Orchids is due to arrive here by plane today. They are to be given away at Jack Royal's new Western Auto Store across from Fire Station on Saturday, June 27.

Jack Royals, proprietor, told the Belle Glade Herald that 500 orchids were picked only hours in their natural habitat in Hawaii and processed and packed at Honolulu's International Airport, and are now on their way to Belle Glade via air express. The Hawaiian Islands are over 3,000 miles from the United States mainland.

from Hawaii in two and a half inches long. Originally developed in Singapore where they were used as garden borders by Malayan princes, these orchids have been raised and developed in Hawaii for over one hundred years, Mr. Royals explained. These full grown orchids are considered to be one of the most delicate, yet one of the most delicate members of the orchid family.

VFW HELPS FFA BOYS
Commander Mapp of the local VFW Camp in reporting results of a small fund which the organization has used over three years to lend to FFA boys for the purpose of cattle projects.

At present the fund is loaned to a boy who added to the loan and purchased three feeders which will be sold by the time school commences next fall. While the fund is only \$75 at present, its use so far has helped

ed more than half dozen boys and has returned a very high percentage of profits that it is an incentive to add to the fund.

MISS WILL LEAVES ON EUROPEAN TOUR
Miss Barbara Will, accompanied by Miss Virginia Bowden, Venice, Miss Violet Davis, Hopewell, left recently for Quebec. From there they will board the SS Atlantic June 27, for a tour of Europe.

They plan to tour England, France, Germany, Italy, Luxembourg and Holland, returning home in two months. The girls are teachers at the Elementary school in Pompano. Barbara is the daughter of Mr. and Mrs. L. E. Will.

MIXED CARS

(Continued from Page One)

tables were sent out and now almost 200 cars have been sent out this past season, and local brokers agree that this year's crop will be substantially larger than last year's.

If a variety of "ballast" is produced here.

By "ballast" the boys point out the following example: Able Stenwinder is a dealer in a 20-000 population City, which is surrounded within a 20 or 30 mile radius by several similar towns, so that Able services 10 to 15 vegetable stands. Many stands will only handle a few crates of most items daily, but when fifteen to twenty commodities have two or three crates of most, with a "heavy" on two or three, there still is a lot of room which most likely "I finish her with cabbage."

Cabbages are bulky and the dollar value isn't so high, and most folks eat cabbage. One broken head of cabbage, which can be sold for a few cents, will take up a lot of room for bulk and for added variety.

Sweet corn has enjoyed a phenomenal spurt in production in the Glades within the past few years, and according to the evidence it is not a "happening." Deliberate and planned research both by the farmer and the scientist developed a strain of corn that will grow successfully in the Glades, and when it "took" it "took off" in high gear.

The Carver car, a 1951 converted, altered into the trees along the north side of the road, and the Carver car, a 1951 converted, altered into the trees along the north side of the road, and the Carver car, a 1951 converted, altered into the trees along the north side of the road.

Mr. Carver was disappointed that his body thrown from the car in its swirling, while the two young ladies were dumped into the Hillsboro Canal. They had to pass between the trees lining the canal on being hurried from the car.

Miss Stenwinder was transferred to the Good Samaritan Hospital in West Palm Beach, while Miss Holstead remained in the Belle Glade Memorial Hospital for treatment and observation.

Mr. E. D. Schiever assisted by J. B. Jones helped the two young ladies from the show water along the canal banks.

Mr. Porter reported that Mr. Porter passed him just before the accident and was gradually pulling away from him, although his speed was not excessive—not much, if any over an estimated forty miles per hour. No witness is known who might offer estimate of the speed of the convertible.

The Berry Funeral Home has the body of Mrs. Carver for burial.

EXPERIMENT STATION HAS NEW ENGINEER

Dalton S. Harrison, received his M. S. degree in Agricultural Engineering from the University of Florida, Gainesville, and is now on the staff of the Belle Glade Experiment Station as assistant Agricultural Engineer.

He is the son of Sam T. Harrison, prominent farmer in Walton County, and was the 11th child of a family of thirteen children. 11 boys and two girls, was born and reared on a farm in Burlington, Fla.

He attended elementary and Walton High schools at DeFuniak Springs and received B. S. A. degree in '52-'53.

In military training he was a graduate of U. S. M. C. Radio School, U. S. Naval Amphibious Communication Officers school Pacific Fleet and U. S. S. Armed Communications Officers school.

In 1942-43 he served as an infantryman and radio chief in the U. S. Marines in the Pacific theatre of operations, and in '46-'47 as Communications Officer of Tank Battalion in Korea.

While in service he was presented with the following medals: Bronze Star, Purple Heart, U. S. M. C. Good Conduct, Asian Occupation, China Service, Asiatic-Pacific War Battle Stars World War Victory, Korean Service and U. N. Command model, also two Presidential citations and two navy unit citations.

Before joining to Belle Glade Experiment Station, Mr. Harrison was a farmer and was with the Civil Service Commission, Bureau of Electric Laboratory Instructor for power machinery, University of Florida, while holding a graduate fellowship.

He is a member of Masons Society of Agricultural Engineers, Disabled American Veterans and Veterans of Foreign Wars.

Mr. and Mrs. Harrison are residing at the station.

LARGEST VEGETABLE

Purchase of supplies co-operatively is the big advantage held out to most, and the savings are substantial; the stability of credit of the individual is more pronounced after years of association with a successful Co-op.

However, a most important effect of substantial co-ops is the well rounded offerings of commodities grown in the community—in the case of Pioneer is the well rounded offerings of commodities grown in the community—in the case of Pioneer is the well rounded offerings of commodities grown in the community.

A Co-op, like Pioneer, is not allowed to handle Tom, Dick and Harry's produce for a profit—the entire operation is for the benefit of members and a limited number of patron customers.

No officer or director of a Co-op draws a salary.

The growth of substantial Co-ops in the Glades in recent years and vigorous financial position attained by them is a challenge to its membership and an impetus to its membership and an impetus to its membership.

the time, but the Senate passed a bill last week with far reaching implications for Florida. It is the so-called "rain-making" bill which is jointly sponsored by several other Senators.

Extensive hearings have been held on this subject during the past several years. Non-scientific and pseudoscientific rainmakers have been practicing their art for many years with many fantastic and far-fetched devices and theories.

The general public has, justifiably, regarded these efforts with skepticism. But in the past seven years genuinely scientific experiments have been made with "highly suggestive results." Dr. Vannevar Bush, President of Carnegie Institution who was one of the principal developers of the Atomic Bomb, and Dr. Vincent J. Schaefer, of the General Electric Research Laboratory, have testified that rain can be "induced."

Dr. Bush testified: "We are on the threshold of an exceedingly important matter, for man."

TOO LATE TO CLASSIFY

My friend Dallas L. Hostetter, executive secretary of the Florida State Retailers Association, comes up with a bright idea that "I'm happy to endorse and pass on."

You have heard the commonly used expression, "I'll take a rain check."

Well, Dallas suggests that here in Florida we ought to change it to "I'll TAKE A SUNSHINE CHECK." He says:

"You have heard the expression 'I'll take a rain check' thousands of times. It may be an acceptable expression everywhere else, even in California, but it certainly is not appropriate here in Florida, and there should be a suitable fine or forfeit attached to its use in the Sunshine State."

"Let's make it, 'I'll TAKE A SUNSHINE CHECK' as the new Florida way of politely postponing a pleasure or a treat proffered by a friend. Let's make it a habit, and when we travel let's spread Florida sunshine wherever we go. It is a novel and cheerful bit of advertising, too."

"One of Florida's many fine service clubs might well make a project out of this suggestion and inaugurate a statewide campaign to popularize the new Florida-colored expression, 'I'll Take a Sunshine Check' to replace the old and shopworn, 'I'll take a rain check.'"

The Florida State Advertising Commission might find a way to promote the idea in its literature or advertising. The thing has real possibilities. We might even form a Florida Sunshine Club to dramatize the idea."

"Such a club would have no officers, no dues, no meetings and no by-laws, save one. To become a member, a person need only to adopt the 'I'll TAKE A SUNSHINE CHECK' habit and use of the old rain check gas would be immediate cause for suspension of membership, plus a stipulated penalty."

"If the suggestion doesn't appeal to you right now," says Dallas, "TAKE A SUNSHINE CHECK on it for later consideration."

Now that Florida is about to have a bob-tailed turnpike, it is interesting to note that the Ohio Supreme Court recently upheld the Ohio State Turnpike Commission program to accept only bids that specify concrete for the state's proposed 341 miles of four-lane turnpike, from the western tip of Pennsylvania to the Indiana border which, when added to the present Pennsylvania turnpike, will provide a continuous four-lane concrete road for 568 miles from near Philadelphia to Indiana.

The State of Indiana is planning to construct a connecting turnpike from the Ohio line to Gary, a distance of another 190 miles, where it will connect with the Tri-State and Calumet Expressways now completed in Illinois enabling motorists to travel by turnpike on a four-lane concrete highway from Philadelphia to Chicago.

A north-south east coast turnpike from Boston or New York to Florida would be worth millions of dollars to this state, and if Florida would take the lead by constructing her end from the Georgia line to Miami, other states would come along as has Ohio, Indiana and Illinois in providing the east-west turnpike.

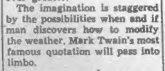

Permanence and low upkeep cost should make the use of concrete imperative on such highways and the Ohio Court shows sound judgment in backing up the Ohio Road Board.

has begun for the first time to affect the weather in which he lives, and no man can tell where such a move will finally end."

All through the arid west today, professional rainmakers are inducing rain in many instances through a process of "seeding clouds." This has already developed into quite a business. Why is Florida so vastly involved in the measure to create a committee "to study and evaluate experiments in weather modification?"

Well, if we are able to obtain rain when we need it, and divert rain to the ocean area when we don't want it, what a paradise we would have. In addition, studies have indicated that scientists may soon be able to disperse, or divert, hurricanes, thus relieving Florida of this annual threat. Probably the most important by-product of this new development is the ability to convert salt water into fresh water. Imagine what a relief this would be to Key West (which pipes all its fresh water in from nearly 150 miles away), Charleston, S. C., and coastal areas where the problem of obtaining fresh water is growing ever more acute.

The imagination is staggered by the possibilities when and if it discovers how to modify the weather. Mark Twain's most famous quotation will pass into limbo.

FLA'S. MILK PRODUCTION

EQUALS ITS PEAK

Florida's 172,000 dairy cows produced 180 million gallons of milk last year.

This 1953 volume of milk produced in Florida was 11 percent above the 1951 gallonage, the Florida State Chamber of Commerce reported recently in recognition of June, Dairy Month.

Florida now produces very nearly all the milk consumed in the State. Last year, 1,090,880 gallons of milk were imported from other areas and about half this amount was exported from Florida into adjacent states.

This week's business review of the State Chamber's research and industrial division shows a total importation of 2,005,452 gallons of forty-percent-cream milk into Florida last year, more by 12 percent than in 1951. Cottage cheese importations increased 32 percent and amounted to 3,698,817 pounds. Small amounts

of cottage cheese and of creamery butter are produced in Florida.

Florida's leading manufacturer of dairy product is ice cream. Production in 1952 of ice cream and related frozen desserts reached 12,500,000 gallons made in the 400 wholesale and retail plants in the State. This 1952 total was up 2 percent from the 1951 production.

The dairy industry in Florida is marked by unusual problems which stem principally from variations in seasonal demands and from a need for increased production of feed crops. However, significant advances have been made in recent years through the cooperation of the industry and governmental agencies.

RAINBOW GIRLS

AWARDED PLAQUE

Belle Glade Order of Rainbow was awarded a Masonic Home Plaque in recognition of doing the most work for the Masonic Home this year.

The plaque was presented to Joan Rabin, worthy adviser, by the Arlo Bean of Tampa, at the banquet held at the Hillsboro hotel during the seventh Assembly meeting of Rainbow Girls in Tampa, June 19-21.

Tampa won the plaque last year the Belle Glade girls winning the year before. The plaque may be kept permanently.

If won three consecutive years, Gloria Crosby, Beverly Phelan and Joan Rabin were delegates to the Assembly.

Rainbow girls will have their meeting Monday night at which time plans will be made for the summer.

KILLINGER OFFERS SUGGESTIONS FOR MAKING GOOD HAY

Proper use of a slatted-floor barn equipped with a heated air system offers the Florida farmer a better chance for success in making hay than trying to make hay in the field, according to Dr. Gordon Killinger of the University of Florida Agricultural Experiment Station.

"Because of our frequent rains in the summer," the groomist explains, "it is difficult to make high quality hay in the field. Considerable quantities of hay are made in the field in Florida every year, but much of it is of comparatively poor quality. The slatted-floor barn and artificially heated air for drying the hay have thus long high quality hay in our high quality hay in our state."

On farms where much hay is produced in the summer, it is advisable to use mechanical equipment such as automatic pick-up balers, bale loaders, side delivery racks hay loaders and bales, and cost-effective drying barns with artificially heated air.

"Grass or legume hay can be produced more cheaply in Florida with such equipment on a large farm than it can be bought from other states," the Experiment Station worker says.

Pangola, Coastal Bermuda, Dallas, Para, and Bahia grasses and hairy indigo, Alyce clover, and other legumes can be used for making good hay if they are cut at the right stage of maturity and handled properly.

Dr. Killinger offers these suggestions for making hay in a drying barn:

1. Cut grass in the morning. It rain does not threaten, leave it in the field until the second day.

Bale it loosely or pick it up without baling and place it in the heating barn.

2. Stack baled hay slowly from two to four bales deep and with all cracks or holes stopped. Distribute loose hay evenly over the dryer floor. Do not have tightly packed and loosely packed hay in the barn at the same time.

3. Have the heated air in the barn 20 to 30 degrees hotter than outside air. Heat may be increased for quick drying, but temperatures above 150 degrees may brown hay as it approaches dryness. Hay may be stored after its moisture content has been reduced to 20 percent.

Hay dried on clear days may be cured satisfactorily by forcing heated air through it at night and normal unheated air through it during the day. This method will prolong the drying process, but will reduce the cost.

After cutting a crop of hay from a pasture, apply fertilizer to the stubble (which should be at least three inches in height, as closer cutting will delay comeback of grass). As much nitrogen, phosphorus, and potassium are removed from the field

when the grass is cut for hay, the crop will not come back rapidly, if it is not given additional fertilizer.

New CASE Field Forage Harvester

Here's a sturdy machine which provides a real short-cut in the making of corn or sorghum silage. In one power operation, the Case field forage harvester cuts the standing row crop, chops it into short, uniform lengths, and loads the chopped material into truck or wagon driven alongside or trailed behind. Also may be equipped with pick-up attachment for windrowed hay, green or dry. Now see about it.

HOUSES CHANGED AT CITY HALL FOR NEXT TWO WEEKS

Office hours at South Bay City Hall will be changed next week during the two weeks' vacation absence of City Clerk, Mrs. Mabel Barlow.

Jack Warren will be in the office to accept water account and garbage permit payments all day Monday, Tuesday, Wednesday mornings, Thursday and Friday afternoons and Saturdays noon.

PASTOR'S WIFE IS

Continued from page 5
error Earl Warren and FBI Director J. Edgar Hoover.

In addition, they were commended by William H. Branson, president of the Seventh-day Adventists, for their "staunch stand for right principles in this time of grave peril."

In a letter read by Edine W. Dunbar, Adventist world youth leader, President Eisenhower said in part: "My warm greetings go to all of you meeting in San Francisco for the Pan-American Youth Congress."

Joe H. Usher has purchased the Lonnie Warren cottage on Park Avenue and is moving his family to their new home.

Mr. and Mrs. R. O. Mitchell left this week for Hamilton, N. Y. where they will operate a seasonal store for harvest hands in the market garden area.

HARDY'S BEST TO TOUR EUROPE

Mr. and Mrs. M. J. Hardy, accompanied by Edwin Best of Belle Glade, left here Wednesday for Miami where they embarked on airlines for a 7-week tour of London, Paris, Rome, and other European cities.

The Hardy's will be met in London by their son, Sgt. Ray N. Hardy and visit him and his wife at Oxford until July 1st. They will then be conducted to France, Belgium, Germany, Switzerland and Italy, ending with a three day stay in Paris.

SERVICES HELD FOR CHARLES H. DENTON

Funeral services for Charles Herman Denton, 6M/2, age 24, were conducted Tuesday at the Belle Glade Baptist Church, the Rev. W. M. Malcolm, pastor officiating.

Pall bearers were A. O. Walker, Jr., Larry Royce, Eugene Cunningham, Ward Harrison, Rufus McMillan and D. L. Shivers.

Honorary pall bearers were Eddie Crosby, Jack Whitlock, B. Smith, Jr., and Jack Cromartie.

Burial was made at Woodlawn Cemetery, West Palm Beach.

LEGION AND AUXILIARY JOINT MEETING SCHEDULED JUNE 28TH

The South Bay America Legion and Legion Auxiliary met at the Legion Hall Monday evening to plan for attendance at a joint installation of officers on June 28th at Pahokee.

Legion Post and Auxiliary Units officers from Clewiston, South Bay, Belle Glade, Pahokee and Canal Point will be in attendance at that time by the Ninth District Commander and Ninth District President and their installation teams. Mrs. W. C. Allen of South Bay is Ninth District President and her team officers are all from the South Bay and Belle Glade Units.

FIVE INJURED IN HIGHWAY COLLISION

Five persons were severely injured and two cars demolished in a highway accident, 1-2 miles east of Bare Beach on S. No. 80 about one o'clock Saturday afternoon, according to the report of Trooper J. P. Bertrand.

William Melchert, Elmwood Park, Ill., driving a Chevrolet sedan west was struck head-on by a Ford driven by Willie Alford Brown, negro, of Lake Harbor, who came across the center line to strike the Melchert car. Brown was traveling east.

Melchert suffered a fractured leg, multiple cuts and bruises. His wife, Mildred, age 43, suffered multiple contusions. Their daughter, Marcia, age 13, received cuts on her forehead.

Brown had multiple face lacerations and bruises and fractured ribs. His companion Ethel Lee Brown, age 28, has fractured ribs and was badly scalded by the radiator water. Both cars were demolished, an estimated \$3,000 damage. All five were hospitalized in the Clewiston hospital. Brown was charged with driving on the wrong side of the road and causing an accident.

Food Sense—Not Nonsense

Worried about vitamins? Afraid of carbohydrates? Puzzled as to how to get the most out of your food? Avoiding fats and sugars? In spite of the fact that an increasing knowledge of nutrition has shown the country over the past few years, food crazes have been sweeping the country. It is essential to know there is no substitute for a well-balanced diet, patterned on the basis of seven food groups.

By an every day selection of foods from these groups you can be sure of meeting individual needs for vitamins, minerals, protein, fats and carbohydrates. All of these are essential to your health and well-being. To have a well-balanced diet, with all needed health giving factors, select foods from these following groups. (Servings are given as eating guides.)

Grains and cereal products, such as wheat, rice, corn, oatmeal, etc. These are rich in vitamin B, essential to good vision, and iron to build red blood cells.

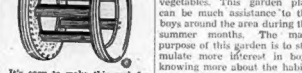

Oranges, tomatoes, grapefruit and other fruits. These furnish vitamin C, essential for healthy gums and body tissues. Potatoes and other vegetables and fruits. One potato daily and two more servings of the others. These are thirty sources of needed vitamins and minerals.

Milk and milk products, such as cheese and ice cream. One pint of milk for adults and more for children, daily. These are especially important for protein and calcium. Meat, poultry, fish and eggs—two or three tablespoons daily. These are high in protein and iron. Butter and fortified margarine—two or three tablespoons daily. These are high in vitamins A, D, E, and K. The important point is to select foods from each of these groups every day. Your diet will be a good one if you follow these guidelines.

Some 1800 of the young people were official delegates and participated in all business sessions of the congress. Most of these in attendance—both of local and unofficial delegates—were combining the trip to San Francisco with sight-seeing trips along the way.

In charge of the program were Dunbar, Theodore Lucas and Lawrence Skinner, Adventist youth leaders from the denomination's international headquarters in Washington, D. C.

Barbed Wire Reel

It's easy to make this reel for barbed wire from an old automobile wheel and five 18-lb two by four. Then, with the casting around the center as it is in two equal halves. Then, with the outside of the two halves towards the center, space the two by four, and nail them to the center. The reel, when in the hands of a farmer, will roll easily on the ground to and fro, unrolling, barbed wire.

NEGRO NEWS

NEW FARMERS OF AMERICA NEWS

Our summer program has started. One of our aims is to keep the late laboratory plot on the south side of Gladesboro. Labor camp in fair condition where the fall preparation work will be very busy. In farm condition. An ample amount of seeds and fertilizer have been stored away in a suitable place. We can get an early start in farming this coming school term.

Our summer garden has been started in front of the main school building consisting of sweet corn, okra and variety vegetables. This garden plan can be much assistance to the boys around the area during the summer months.

The main purpose of this garden is to stimulate more interest in boys knowing more about the habits of vegetable growing, and to encourage them in farming in later years of their lives.

Much of the Vocational Agriculture Teachers time is being spent in:

(a) Bringing follow-up records of each boy registered in vocational agriculture, up to date.

(b) Bring follow-up records of each boy registered in vocational agriculture, up to date.

each boy graduate from high school up-to-date for the last six years.

(c) Making up a program of work to be carried out during the next school term.

(d) Making up reports requested by the State Officials of the State Department of Agricultural Education.

July 6th through 10th our Agricultural Teacher will be away attending the Agricultural Teachers Conference at Florida A. & M. College, Tallahassee, called by the State Agricultural Educational officials. The main purpose of this conference is to acquaint each Vocational Teacher in the State on approved methods of teaching boys in the field of Agriculture.

Plenty of HUSTLE from the instant you START

The automobile pictured here is a 1953 Buick Special with Twin-Turbo Dynaflow.

You discover what that means when you take the wheel—when you try it for getaway—when you head it up tall hills—when you maneuver it in traffic.

The instant you want to move, you move.

You can go from standstill to a legal 30 mph quicker than quick. Fact is, this spectacular new TT Dynaflow gives you getaway, plus silence, plus smoothness, in a combination no other automotive transmission in the world can equal.

The instant you want emergency power, it's there—velvet forth from a brilliant Fireball 8 Engine with the highest horsepower and compression ratio ever to power a Buick Special.

The truth is, the instant you feel this big, broad, thrill-charged beauty in motion, you'll know it for a performance automobile—nimble and eager, responsive as quicksilver.

But exhilarating action is just part of the story here.

There's spacious roominess. There's a magnificent ride. There's superb handling ease. And to cap it all, this Buick delivers for little more than the "low-priced" cars.

Why not drop in on us this week? We'll be mighty proud to have you try the greatest Buick Special yet built.

*Standard on Roadmaster, optional at extra cost on other models.
